Title: Incorrect age range for children when selecting age

Description: The window for selecting the child's age displays the range from 0 to 17 years, although logically it should be from 1 to 13 years, since “under 13 years” is indicated under the selection of children

Steps:

1. Select the window for selecting persons
2. Add at least 1 child
3. Click on the window to select the child's age
4. Check the available age options

Surroundings: Chrome 35.23.332.1, Windows 11

Priority: High
